PROFILE

Experienced website developer with 5 years of expertise focusing mainly on front-end development. With professional experience in Myanmar and Singapore, I have designed and launched over 20 websites, covering various types from management systems and dashboards to branding websites. Skilled in collaborating effectively and consistently transforming client requirements into functional products.

WORK EXPERIENCE

Full-stack Developer

LoansEstate (Singapore - Remote) 2024 May - Current

- Add new features and change requests by using Material UI and React.js.
- Develop and adjust REST APIs with Node.js, Express, and MariaDB.
- Update the client's website by utilizing WordPress.

Front-end Developer

YSQ International (Singapore) 2022 Oct - 2024 Apr

- Utilized React.js with Vite.js to create and manage 6 product brand websites, 3 company websites, and 5 internal office applications.
- Worked closely with cross-functional teams to transform requirements into fully operational websites.
- Created and maintained office intranet using SharePoint.

Front-end Developer

The Amdon Group (Myanmar) 2019 Oct - 2022 Aug

- Engaged in the creation of three core applications named ClassWerkz, Nodma, and StemWerkz utilizing AngularJS and Angular2.
- Conducted both manual and automated testing employing Cypress and Jasmine.
- Contributed to expanding the frontend team from 5 to 7 members.

RECENT PROJECTS

LoansEstate

<https://ask.loansupermart.sg>

An online mortgage loan application system where users can select loan package offers, seamlessly automate the application process, and submit it to the respective banks, providing a faster and easier user experience.

Technologies used: Reactjs, Material UI, Html, Css, Javascript, Nodejs, Express, MariaDB

Lighthouse Project

Internal System

An internal company system for calculating product selling prices and storing related tax information, considering variables like import duties, exchange rates, and taxes based on the selected country and product.

Technologies used: Reactjs, Vite, Html, Scss, Javascript, Context API

YSQ International

<https://www.ysq-international.com>

A company website designed for individuals to discover and engage with our group, explore the company's history, and view available positions for the general audience.

Technologies used: Reactjs, Vite, Html, Scss, Javascript, Context API, Swiperjs

Paris Tobacco

<https://www.paristobacco.com>

Another company website, part of YSQ International in Poland, serves the same goal of connecting with a broad audience and presenting the company's background.

Technologies used: Reactjs, Vite, Html, Scss, Javascript, Context API, i18next

Hunnworld

www.hunnworld.com

A website to showcase our heated tobacco products, provide information on where to purchase them, offer customer support, and enable users to register warranties for their purchased devices.

Technologies used: Reactjs, Vite, Html, Scss, Javascript, Context API, i18next

Classwerkz

<https://www.classwerkz.com>

ClassWerkz is a class management system developed to enable you to manage various functions such as tracking attendance and scheduling classes with your key stakeholders.

Technologies used: Angular 5, Typescript, Html, Css, Bootstrap, JQuery

STEMWerkz

<https://www.stemwerkz.org>

STEMWerkz is a fun environment for kids to learn about science, technology, engineering, and mathematics through 4000 minutes of interactive content.

Technologies used: Angular 10, Typescript, Html, Css, Bootstrap, JQuery
